

G Landscape Division LLC.

HAS EARNED THE PRESTIGIOUS DIAMOND CERTIFIED AWARD

Independently Rated Highest in Quality

G Landscape Division LLC. provides a complete range of landscaping services for residential and commercial clients in Marin, Sonoma, and San Francisco Counties. The company has the in-house capabilities to handle everything from routine lawn maintenance to full-scale landscape design/build projects, and it's also qualified to install irrigation systems and custom water features like fountains, ponds, and waterfalls.

Manager Scott Reilly says much of G Landscape Division's success can be credited to its customer-oriented business practices. "Whenever we start a project, the first thing we do is get a sense of what the client wants to achieve. We bring a lot of experience and plant knowledge to the table, so we're able to create landscapes that can be enjoyed during every season of the year."

G Landscape Division is known for its honest, collaborative approach to the landscaping process, which Mr. Reilly says is essential for achieving long-lasting results. "Sometimes a garden will look better on paper than it does in the ground, but we're always straightforward with our clients and we'll tell them if something isn't working. They know we'll take the time to make the finished product look as beautiful as possible, and they really appreciate that."

COMPANY PHILOSOPHY

"We understand that every person's landscape palette is different, so we keep an open mind during each job and collaborate with the customer to create something that showcases their unique ideas. By focusing on professionalism, customer service and communication, we've been able to build great relationships with our clients."

EXCERPTED SURVEY RESPONSES

"They have good knowledge and follow-through."—Eliza T.
 "They really care about the quality of their work. They're diligent and they keep their eyes open all the time for the health of the plants. Their pruning is superb and they do a great job."—Madeleine B.
